Response Requested to 1993 Patent Examiner's Action Survey

As part of the continuing quality reinforcement efforts of the Patent and Trademark Office, the Office has sent out a Patent Action Survey Form with each Patent Examiner's Office action mailed during a period of several weeks during December, 1993-January, 1994. **If you have received one or more of these forms, please complete each one, no later than the time of response to the Office action being surveyed.**

The survey is intended to determine whether Office actions are perceived to be clear and complete on certain specific and important items related to patent examining practices and procedures. The results of the survey will be used in the development of Office training programs. The survey is a follow-up to the Patent Action Surveys conducted in 1991 and 1992. Where training is provided to address identified deficiencies in performance, follow-up surveys are intended to be conducted in the future to determine whether the training was effective enough to improve performance in the measured areas.

The Survey Form is brief and easy to complete and does not permit identification of the respondent or of the particular application involved. The Survey Form may be completed at the time of response to the Office Action. It is possible that a practitioner may receive many Office Actions containing a Survey Form during the survey period. To have results that are meaningful, the Office needs a high response rate. Therefore, it is **important** that patent practitioners complete each survey form **no later than the time of response to the Office action being surveyed**. To assure that this form is completed and mailed back to the address indicated on the Survey Form, it would be desirable for patent practitioners to have their office managers/docketing personnel take appropriate steps to keep the form and Office action together for the practitioner's benefit.

Your cooperation in completing the Survey Form is appreciated.

Reference Collections of U.S. Patents and Trademarks Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information in various formats from the U.S. Patent and Trademark Office. Many PTDLs have on file all full-text patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PDTLs have both the patent and trademark sections of the *Official Gazette of the U. S. Patent and Trademark Office*. The full-text utility and design patents are distributed numerically on 16 mm microfilm, and plant patents on color microfiche. Patent and trademark search systems on CD-ROM (Compact Disc-Read Only) format are available at all PTDLs to increase utilization of and enhance access to the information found in patents and trademarks. It is through the CD-ROM systems that prelminary patent and trademark searches can be conducted through the numerically arranged collections.

All information is available for use by the public free of charge.

In addition, each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials. Facilities for making paper copies of patent and trademark information are generally provided for a fee.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

MARKS PUBLISHED FOR OPPOSITION

The following marks are published in compliance with section 12(a) of the Trademark Act of 1946. Applications for the registration of marks in more than one class have been filed as provided in section 30 of said act as amended by Public Law 772, 87th Congress, approved Oct. 9, 1962, 76 Stat. 769. Opposition under section 13 may be filed within thirty days of the date of this publication. See rules 2.101 to 2.105.

A separate fee of two hundred dollars for opposing each mark in each class must accompany the opposition.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

The United States Patent and Trademark Office received notification from the World Itellectual Property Organization (WIPO) that Kyrgyzstan, the Republic of Moldova, and Tajikistan deposited their declarations of continuation of the application of the Patent Cooperation Treaty (PCT) on February 14, 1994. Kyrgyzstan, the Republic of Moldova, and Tajikistan became the 65th, 66th, and 67th Contracting States, respectively, of the PCT on February 14, 1994. Consequently, nationals and residents of Kyrgyzstan, the Republic of Moldova, and Tajikistan are entitled to file international applications on and after February 14, 1994, and from the same date it is possible to file international applications designating and electing Kyrgyzstan (country code: KG), the Republic of Moldova (country code: MD), and Tajikistan (country code: TJ).

Under PCT Regulations, applicants are afforded the possibility of requesting the extension of the effects of any international

application filed on or after December 25, 1991 (the date on which the Soviet Union ceased to exist), to successor States which have made a declaration of continuation. PCT Rule 32 will allow the extension of all international applications filed between December 25, 1991, and April 14, 1994, to Kyrgyzstan, the Republic of Moldvola, and Tajikistan.

Applicants or their agents in respect of each international applications application concerned will receive a notification from the International Bureau of WIPO, informing them about the possibility and the applicable conditions for extending the effects of their international application to Kyrgyzstan, the Republic of Moldvola, and Tajikistan.

Eurasian Patent Convention Initialed By Eleven Successor States Of The Soviet Union

In a notice received recently from the World Intellectual Property Organization, the following was announced:

1. On February 17, 1994, at the headquarters of the World Intellectual Property Organization (WIPO) in Geneva, representatives of eleven of the twelve member States of the Commonwealth of Independent States have adopted and initiated a multilateral treaty entitled "Eurasian Patent Convention."

2. The treaty establishes a new intergovernment organization called the "Eurasian Patent Organization." Once in force, the treaty will allow nationals of any country to obtain patents of invention from the Eurasian Patent Office to be set up in Moscow. Such regional (Eurasian) patents will have effect in all countries of the Eurasian patent system.

3. The Eurasian Patent Convention not only provides modalities of applying for and obtaining Eurasian patents but also for their legal effects: patented inventions can be used only with the authorization of the holders of the patents. Subject to the payment of a yearly renewal fee, any Eurasian patent can be maintained in force for 20 years.

4. The Eurasian patent system will be of enormous advantage both for local and foreign applicants. They will not have to apply for a patent separately in each country but with single application, filed in the Russian language in Moscow, they can obtain, with a single act and a single payment, patent protection in all the States members of the new system. Foreigners shall be able to apply for Eurasian patents *via* the Patent Cooperation Treaty (PCT), a treaty administered by WIPO in Geneva, which allows them to postpone the translation of their applications into Russian for 20 or 30 months.

5. Any country may become a party to the Eurasian Patent Convention, provided it is a party to two WIPO-administered treaties: the Paris Convention for the Protection of Industrial Property and the Patent Cooperation Treaty. Most of the States members of the Commonwealth of Independent States already fulfill this condition.

6. The Convention, adopted in the presence of Dr. Arpad Bogsch, Director General of WIPO, was initialized by the representatives of Armenia, Belarus, Georgia, Kazakhstan, Kyrgyzstan, the Republic of Moldova, the Russian Federation, Tajikistan, Ukraine and Uzbekistan.

7. The Convention is expected to be presented in the next months for formal signature to one of the regular meetings of the Heads of Governments of the Commonwealth of Independent States. Instruments of ratification will be deposited with the Director General Of WIPO who, according to the terms of the Convention, has not only the role of depositor of the Convention but also the role of mediator among the member States in case of possible disputes among them concerning the interpretation and application of the Convention.

8. WIPO is mentioned in the Convention as having a permanent advisory status in the governing body ("Administrative Council") of the Eurasian Patent Organization.

9. The negotiation of the Convention took less than a year. It took place in three meetings of the Interstate Council for the Protection of Industrial Property held in Moscow in May 1993, in Uzghorod (Ukraine) in September 1993 and in Geneva in February 1994. WIPO was invited to each meeting to give advice and assist in the drafting of the Convention. The Convention reflects the contemporary trends of patent legislation and administration and is compatible with the multilateral industrial property treaties administered by WIPO and the provisions on patents contained in the TRIPS draft of GATT.

Survey of Registered Practioners in Patent Cases

Pursuant to 37 CFR 10.11(b), a survey letter was mailed on January 18, 1994 from the Office of Enrollment and Discipline (OED) to all practitioners in patent cases whose last names began with K through O. Enclosed with the letter was a blue data sheet which was to be completed and returned to OED as soon as possible. If your last name begins with K through O and you did not receive a survey letter, please contact Shirley B. Rasheed at (703) 308-9617.

Response Requested to 1993 Patent Examiner's Action Survey

As part of the continuing quality reinforcement efforts of the Patent and Trademark Office, the Office has sent out a Patent Action Survey Form with each Patent Examiner's Office action mailed during a period of several weeks during December, 1993-January, 1994. **If you have received one or more of these forms, please complete each one, no later than the time of response to the Office action being surveyed.**

The survey is intended to determine whether Office actions are perceived to be clear and complete on certain specific and important items related to patent examining practices and procedures. The results of the survey will be used in the development of Office training programs. The survey is a follow-up to the Patent Action Surveys conducted in 1991 and 1992. Where training is provided to address identified deficiencies in performance, follow-up surveys are intended to be conducted in the future to determine whether the training was effective enough to improve performance in the measured areas.

The Survey Form is brief and easy to complete and does not permit identification of the respondent or of the particular application involved. The Survey Form may be completed at the time of response to the Office Action. It is possible that a practitioner may receive many Office Actions containing a Survey Form during the survey period. To have results that are meaningful, the Office needs a high response rate. Therefore, it is **important** that patent practitioners complete each survey form **no later than the time of response to the Office action being surveyed**. To assure that this form is completed and mailed back to the address indicated on the Survey Form, it would be desirable for patent practitioners to have their office managers/docketing personnel take appropriate steps to keep the form and Office action together for the practitioner's benefit.

Your cooperation in completing the Survey Form is appreciated.

Reference Collections of U.S. Patents and Trademarks Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information in various formats from the U.S. Patent and Trademark Office. Many PTDLs have on file all full-text patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PTDLs have both the patent and trademark sections of the *Official Gazette of the U. S. Patent and Trademark Office*. The full-text utility and design patents are distributed numerically on 16 mm microfilm, and plant patents on color microfiche. Patent and trademark search systems on CD-ROM (Compact Disc-Read Only) format are available at all PTDLs to increase utilization of and enhance access to the information found in patents and trademarks. It is through the CD-ROM systems that prelminary patent and trademark searches can be conducted through the numerically arranged collections.

All information is available for use by the public free of charge.

In addition, each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials. Facilities for making paper copies of patent and trademark information are generally provided for a fee.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
